

# Keg Flow®

A high density, beverage storage system

***Efficient and  
cost effective***

Steel King continues its history of product innovation with Keg Flow, a customizable storage system designed for brewery applications. The gravity fed rollers form keg flow lanes that accommodate a sixth-barrel size.

## **Space saving**

Ideal for Last In/First Out inventory rotation, the system allows you to easily store multiple product SKUs in a way that opens up valuable floor space. Your product is always easily accessible, with ergonomic access from either the front or back of the unit at any time.

## **Versatile**

Multiple configuration options are available with up to two levels of roller system and up to two levels of traditional storage above.\*

## **Easy to install**

The Keg Flow system is easily installed with just two people. See the installation video at [www.steelking.com/kegflow](http://www.steelking.com/kegflow)

*A space saving  
light storage system*

*Visit our website to see  
Keg Flow Rack in action:  
[www.steelking.com/kegflow](http://www.steelking.com/kegflow)*

\*This maximum size configuration is only for non-seismic zones (A, B). Consult us for custom system designs to meet seismic zone requirements.

Imagine! You could store 32 1/6-barrel kegs in a FOUR by FOUR foot space!

Environmentally friendly powder coat finish. Vertical uprights are Vista Green and horizontal beams are Poppy Orange.

Standard Depth (all designs): 42"

**Easy to Order!**

**1. Select your style:**

**Flow rack only**

*Kit contains: 2 uprights, 6 beams, 2 stop rails, 4 hat shape pallet supports and TEK screws, 4 anchors and 4 shims.*

**Flow rack plus one level selective storage**

*Kit contains: 2 uprights, 8 beams, 2 stop rails, 4 hat shape pallet supports and TEK screws, 4 anchors and 4 shims.*

**Flow rack plus two levels selective storage**

*Kit contains: 2 uprights, 10 beams, 2 stop rails, 8 hat shape pallet supports and TEK screws, 4 anchors and 4 shims.*

**2. Select width:** 48" (includes 8 keg flow lanes, capacity: 32 kegs)  
96" (includes 16 keg flow lanes, capacity: 64 kegs)
